**Advice to All Parent(s)/Carer(S) - Confirmed COVID-19 case**

Dear Parents/Carers,

We are firstly pleased to advise We have today received notification that the confirmatory PCR test relating to yesterday's (10 May) positive LFD test has given a **NEGATIVE RESULT**. This means that all students required to isolate can now return. However, we have had a further confirmed case of COVID-19 within the setting by Public Health.

We are continuing to monitor the situation and are working closely with Public Health. This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

Following advice and guidance from Public Health, we will contact anyone we know who has been in close contact with the student.

**What to do if your child develops symptoms of COVID 19**

If your child develops any symptoms of COVID-19, they should remain at home for at least **10 days** from the date when their symptoms appeared. Anyone with symptoms will be eligible for testing and this can be arranged via <https://www.nhs.uk/ask-for-a-coronavirus-test> or by calling 119.

All other household members who remain well must stay at home and not leave the house for 14 days.

The 14-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school, nursery or public areas and exercise should be taken within the home.

Household members staying at home for 14 days will greatly reduce the overall amount of infection the household could pass on to others in the community

If your child has symptoms, try and keep them as far away from other members of your household as possible. It is especially important that they stay away from anyone who is clinically vulnerable or clinically extremely vulnerable with whom you share a household.

**Symptoms**

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or

- high temperature
- a loss of, or change in, normal sense of taste or smell (anosmia)

**For most people, coronavirus (COVID-19) will be a mild illness.**

If your child or anyone in the household does develop symptoms, you can seek advice from NHS 111 at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/> or by phoning 111.

### **How to stop COVID-19 spreading**

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

#### *Do*

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards
- wear a face covering in communal/public areas

#### **Further Information**

Further information is available at <https://www.nhs.uk/conditions/coronavirus-covid-19/>

Yours sincerely,

**Mr Hadley-Pryce - Headteacher**
