

Introduction to Post-16 Studies - Geography

Studying geography at Bewdley Sixth Form is such a relevant subject for your next step into the real world. Studying the impacts of global diseases, human rights issues, migration, tectonic hazards, coastal erosion, environmental degradation and urban development make this such a meaningful area of study for any student wanting to develop a broad knowledge of relevant issues that the world is facing today. You will develop key skills such as analysis, evaluation and have the opportunity to devise and complete your own fieldwork.

The following challenges will help you develop some of the initial skills and knowledge needed for this course.

[Watch this documentary](#)

Seven World - One Planet

This will give you an overview of the climate in the different continents and the formation of our world's mountains.

[Investigating social inequality in the local area](#)

You will receive this task in your transition week. You will use Census data to find out about variations within the Wyre Forest. If you need another copy please email the staff below.

[Coastal Systems and Landforms](#)

You will receive this task in your transition week. You will carry out research into the coastal system and the formation of landforms. If you need another copy please email the staff below.

[Investigation](#)

Research Birmingham's current regeneration plans. Start your research with the Big City Challenge, but also look at the Commonwealth Games or HS2. Write a 500-word summary.
